THE MONTCHANIN CENTER
— for facial aesthetics —

Founded by a father-daughter team, The Montchanin Center for Facial Aesthetics is a dual-specialty practice housed within Keller Periodontics.

Emily Keller Rockwell, a board-certified Adult-Gerontology Primary Care Nurse Practitioner, is the injection specialist. She specializes in Botox® treatments to help relieve TMJ facial pain and headaches. Emily has also mastered the art of aesthetic injectables, dermal fillers, and medical-grade skin care.

“With my father’s expertise in dental medicine and mine in facial aesthetics, we can help patients both therapeutically and cosmetically,” she says.

SINCE OPENING HIS PRACTICE IN 1988, PERIODONTIST AND IMPLANTOLOGIST DR. G. WILLIAM KELLER HAS CONTINUOUSLY ELEVATED THE FIELD WITH PASSION, EDUCATION, AND INNOVATION.

Over the last 30 years, Dr. G. William Keller has placed more than 15,000 dental implants. It’s an impressive number, but it only tells part of his story.

Prior to specializing in implants, Dr. Keller spent five years as a restorative dentist—a tenure that provided an invaluable foundation for his implant work. “Having a background as a restorative dentist is critical because it helps me better understand where the implant needs to be placed in order to look good and function as well as possible,” he explains.

Dr. Keller is often referred the most challenging cases; nothing is too complex for Keller Periodontics. From a single tooth to full-mouth restoration, Dr. Keller’s team has the expertise to customize a treatment plan for every patient. While providing the most state-of-the-art clinical technologies, the focus is on the patient experience. Upon entering the office, everyone feels welcomed and comforted in his impeccably clean, spa-like, and up-to-date environment.

ALWAYS INNOVATING

“It is my belief that great implant dentistry happens when accompanied by a great foundation of education for both surgical and restorative dentists,” Dr. Keller explains. As an advocate for education, he hosts multiple study clubs for the Tri-State area, attends national symposiums, and teaches with renowned colleagues. Recognizing his aptitude for advancing the field, technology companies frequently choose Dr. Keller to help pioneer new products. Dr. Keller remains on the leading edge of new advancements in periodontics and implantology to best serve his patients.

UNPARALLELED PATIENT EXPERIENCE

With Dr. Keller’s expertise in his field, his patient base is diverse; it’s not uncommon for patients to travel across the globe to be treated by Dr. Keller. “Our team emphasizes that patients see the value in their investment and ultimately feel confident in their end result.”

Unlike other practices, the Keller Periodontics team has a strong tenure. “Several team members have been with the practice for more than 25 years and they mentor our newcomers, creating cohesiveness among our team.”

DR. G. WILLIAM KELLER D.D.S., P.A.
— periodontics and implantology —

Keller Periodontics and Implantology and **The Montchanin Center for Facial Aesthetics** are located in the Montchanin Corporate Center at 20 Montchanin Road, Suite 150, in Wilmington, DE.
